# AcúVista Grace

## New vision of guidance and PoC ultrasound

### Applications:

- Vascular Access
- Anesthesiology
- Biopsy Guidance
- Interoperation Control
- Aesthetic Medicine
- Phlebology
- Diagnostics

Portable ultrasound scanner is specially designed for non-diagnostic applications. A simplicity of its patented unique interface is the main feature of the scanner. Single all-in-one integrated encoder and touchpad with multitouch gestures recognition is used in the ultrasound scanner for the first time. Simple intuitive interface and scrolling toolbar with icons are similar to that one's used at smartphone. Ultrasound image fills almost whole portrait oriented screen. Image size is as large as at 19" landscape orientated screen.

### Ultrasound probes:

- Linear 25mm
- Linear 40 mm
- Convex R40
- Convex R60
- Endocavity R10,
- Microconvex R15
- Microconvex R20
- Custom designed probes
