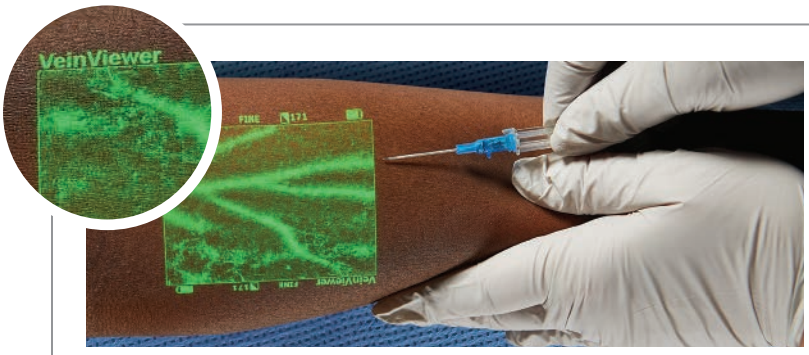
VeinViewer® VISION2

MaxReach provides head-to-toe coverage.

We worked with clinicians to design a device that facilitates easy use in nearly every environment. Only VeinViewer® Vision2 offers a 53" reach for convenient hands-free operation. Quickly and easily assess several potential stick sites without having to reposition the device.

Every patient. Every time.

- ✓ Locate veins up to 10mm deep
- ✓ Locate valves and bifurcations
- ✓ Assess refill rate
- ✓ Make the best choice for your patient



TrueView™

VeinViewer ensures accuracy and ease of use with the markets only in-focus indicator. When the projected image border is clear you can trust the vessel width shown to assist in catheter gauge selection.

See things differently.
