Climatic Tent 2000

GINEVRI CLIMATIC TENT 2000 is ideal to create a REFRIGERATION UNIT watersaturated, refrigerated microclimate inside the canopy.

It comes standard equipped with:

- light-weight and mobile stand on four pivoting castors, with shelf;
- refrigeration unit, with special finned plate for even coolo air flow, and forced air system;
- rod with three hooks to support the canopy. The rod is hinged to fold down for easy storage;
- canopy, Close Top type, to create an isolated microclimate, with four vertical zippers to facilitate the access to the patient;
- high output quiet nebulizer easy to use and to clean.

The Refrigeration Unit with the forced ventilation allows a temperature reduction from 3 a 8°C less then the external temperature.

The Refrigeration Unit system operates in two modes:

- Forced ventilation ("Vent" mode): the fan forces the air circulation around the canopy without cooling it. This mode is used when the nebulizer is operating and cooling is not r equired.
- Forced ventilation and cooling ("Cond" mode): the Refri-geration Unit cools the air under the canopy. This mode is used when the temperature under the canopy has to be lower than the external.

Accessories

6431

Control Unit.

Climatic Tent 2000 can be additionally equipped with "Control Unit" to monitor the following parameters:

Oxygen concentration values, complete with separate high and low concentration user settable audio-visual alarms and O₂ probe; Digital temperature monitor, complete with temperature probe.
